

School Carbon Footprint Web and Mobile app

A.S.F.Zuhra Nadtha

Grade 10

KM/Mahmud Ladies College, Kalmunai

Objective of my innovation: This mobile app and web will help the schools to calculate their own carbon footprint of student transportation

Welcome to the Carbon Footprint Tracker

Log in to access the Weekly Transport Carbon Emission Calculator

Novelty and Innovation

Weekly Transport Carbon Emission Calculator

Select the mode of transport for each day of the week and enter the distance to calculate the total carbon emission:

Select School:

Enter School Code:

Enter distances for each day:

Day	Mode of Transport
Monday	<input type="text" value="Car"/>
Tuesday	<input type="text" value="Car"/>
Wednesday	<input type="text" value="Car"/>
Thursday	<input type="text" value="Car"/>
Friday	<input type="text" value="Car"/>
Saturday	<input type="text" value="Car"/>
Sunday	<input type="text" value="Car"/>

Calculate Total
Carbon Emission

Total Carbon Emission: 0 kg CO2

☐ By vehicle ☒ By walking ☐ By bicycle

calculate the emissions

0a/km

BACK

Target audience

Schools

It will promote competition among the schools to reduce carbon footprint by promoting low carbon transport mode among students

Students

Students will contribute to reduce carbon emission. They can compensate activities that can absorb carbon such as planting trees for their amount of carbon emission.

Ongoing further development

Generating Final Carbon Footprint Report for each school

Display it in a web graph

Launch competition among schools
